

## Introducing the AIS Family

Excellent results are just one reason to choose AIS. Within our united school community, students enjoy world-class education through a combination of dedicated teachers and well-resourced campuses.

Our extensive network of families, friends, and alumni contributes to our strong school spirit. This closely-knit community fosters the warm, positive culture that underpins our safe, caring learning environment.

Since our 1996 commencement, AIS has evolved to support over 700 students from kindergarten to Year 12. Our inclusive philosophy ensures a rich cultural and linguistic environment that makes a world-class education accessible to Australian, International and local families.

*"We believe we made the perfect choice with AIS as our daughters have excelled in their individual abilities, academically and socially. AIS promotes strong family values and welcomes active parent involvement- this has greatly strengthen our bond with the school."* Prabha & Murthy Ragunath - Parents

# Welcome to Our Global Family

Every AIS student enjoys an array of choices from the forefront of education, whether they join us at:

**Kindergarten,**  
where the seeds of creative thinking are sewn;

**Primary,**  
when the shaping of academic and personal developments begins;

**Secondary,**  
to experience wider horizons and new experiences;

**Senior Secondary,**  
for individual guidance and personal growth.

## Leadership by Inspiration

As tomorrow's leaders, we know AIS students must embrace change and become innovators. That's why our dedicated, internationally experienced teachers nurture each student's unique abilities. Every child is guided towards versatile thinking and a broad world view.

Our highly qualified teachers equip students with an aptitude for life-long learning. Students are supported and challenged through goal setting, measuring achievements and celebrating success. Quite simply, every child's valued, respected and encouraged to be excited by learning.

## A Motivational Environment

We have created stimulating surroundings in four well-resourced campuses. Each campus offers a unique learning environment. Every classroom is a self-contained motivational centre and the challenging curriculum is supported through libraries, computer laboratories, resource centres and sporting facilities.

## Education for the 21<sup>st</sup> Century

Offering a fully integrated Australian curriculum, AIS delivers inclusive education through a broad, balanced program. Our individual focus and values-based tuition form a solid foundation for confident global citizens to enter the world.

AIS Applies a student-centred approach to small class groups right across the school. At AIS, we recognise that every student learns differently. We believe learning programs should be flexible and tailored to individual needs. To achieve this, we provide specialist support to students with learning or physical disabilities, and to those requiring extra help with English language.

Through individual learning plans, specialist program and extra-curricular activities, we encourage both academic and personal development.

*"It was the nurturing and friendly atmosphere at AIS that enabled me to excel. I felt welcomed and accepted by everyone. This allowed me to not only be myself, but also comfortable in my learning environment."* Karla Haysom - Year 12 graduate

## Our Education Edge

Many things make AIS a special place.

Our commitment to active partnership between parents, students and school encourages positive learning attitudes and reinforce the core values that secure personal and academic success.

AIS operates on the Southern Hemisphere school year of January to December. As the only international school in Indonesia teaching the Australian curriculum, we offer an innovative learning program with highly qualified and internationally experienced teachers.

But above all, our warm, supportive community puts AIS ahead of the class.
